## Platform Support

See [Nagios Software/OS compatibility matrix](#) for supported OS and software versions.

If you discover bugs or have fixes for installing Nagios XI on other platforms, please let us know. We will do our best to incorporate your improvements to expand support for additional platforms in future XI releases, which will make future installation processes smoother for you and your clients.

## Installation Prerequisites

**Important Note:** Nagios Enterprises highly recommends and will only support installing Nagios XI on a newly installed, "clean" system (a bare minimal install with nothing else installed or configured).

- Attempting to install Nagios XI on a pre-existing system with other applications already installed can cause the Nagios XI installation process to fail, critical system components and settings (e.g. database servers) to be modified in a way that negatively affects other applications, and previously installed applications to be automatically upgraded or removed. While installing XI on a system with other applications is possible, it is not recommended due to the possible interactions and complexity of multiple components that are required for Nagios XI to function. If you choose to ignore these warnings, you do so at your own risk.
- Other Nagios products such as Network Analyzer, Log Server, and Fusion should not co-exist on the same server.
- Internet access is required for installation and upgrades.

Visit the [Hardware Recommendations for Nagios XI](#) documentation for hardware requirements.

## Terminal Access

These instructions require you to establish a terminal session to the server you plan to install Nagios XI on. You will need to log in to your server as the root user to perform the installation (or a user with root privileges).

## Manually Install Nagios XI

Install Nagios XI by issuing the following commands in your terminal session:

```
cd /tmp
wget https://assets.nagios.com/downloads/nagiosxi/xi-latest.tar.gz
tar xzf xi-latest.tar.gz
cd nagiosxi
./fullinstall
```

**Note:** If you need to install a specific version of Nagios XI, please visit [Nagios XI previous versions](#) page to obtain the URL, and use that in the `wget` command above.

You will be prompted during the Nagios XI install to enter passwords for the Nagios XI database. See the [Passwords](#) section for more information.

Please proceed to the [Finalize Installation](#) section.

## RPM Installation

See [Nagios Repositories](#) for instructions on how to install Nagios XI via online RPMs.

Please proceed to the [Finalize Installation](#) section.

## Passwords

During manual installation, you will be prompted to enter a password for the following Nagios XI objects:

```
MySQL nagiosxi user
MySQL dbmaint nagiosxi user
MySQL nagiossql user
MySQL ndoutils user
```

If you do not enter a password for any or all of these objects, a randomized password will be created for you. You can always find these passwords after install in the following file:

```
/usr/local/nagiosxi/etc/xi-sys.cfg
```

## Finalize Installation

When the installation finishes, you should see the following message:

```
Nagios XI Installation Complete!
```

```
-----
```

```
You can access the Nagios XI web interface by visiting:  
http://<server_address>/nagiosxi
```

1. Navigate to the user interface by using the URL provided in your terminal session. You will be presented with the **Nagios XI Installation** screen.
2. For **General System Settings**, customize system settings based on your environment. Choose the license type (**Trial**, **Licensed**, or **Free**). Once all settings are configured, click **Next**.

The screenshot displays the 'Nagios XI Installation' web interface. At the top, it says 'Finalize your Nagios XI installation and step the initial configuration. These settings can be changed later.' Below this is the 'General System Settings' section. It contains several configuration options: 'Program URL' with a text input field showing 'http://192.168.242.133/nagiosxi/', a note about the default URL, 'Timezone' with a dropdown menu set to 'America/Chicago', 'Language' with a dropdown menu set to 'English (English)', and 'User Interface Theme' with a dropdown menu set to 'Neptune'. There is also a checkbox for 'Use HTTPS only (all HTTP requests will be redirected to HTTPS)'. Below this is another 'General System Settings' section for 'License Type'. It has three radio button options: 'Trial' (selected), 'Licensed', and 'Free (Limited)'. A note states 'Trial includes unlimited nodes + enterprise features. Includes access to trial support.' There is a link 'Click to get a trial key' and a 'Trial Key' text input field. At the bottom right, there is a 'Next >' button.

3. For **Admin Account Settings**, change the default password, full name, and email address.

**Note:** The Nagios Support Team cannot recover your password if you forget it. Be sure to save it in a secure location, such as a password manager.

The screenshot shows the 'Nagios XI Installation' screen with the 'Admin Account Settings' section. It includes fields for Username (nagiosadmin), Password (#\*XhCGiYBp4C.J2V@UppG), Full Name (Nagios Administrator), and Email Address (root@localhost). Below this is the 'Admin Notification Settings' section with a checked box for 'Send this account email notifications' and a link for 'Advanced email notification settings'. At the bottom are 'Back' and 'Finish Install' buttons.

4. Click **Finish Install** to save these settings.
5. The **Installation Complete** screen will appear displaying your login credentials. Click the **Login to Nagios XI** button to continue.

The screenshot shows the 'Installation Complete' screen. It displays the following credentials: Username (nagiosadmin) and Password (#OCg3TqN@7MMh.gK^f\$e). A 'Login to Nagios XI >' button is at the bottom.

6. Enter your username and password. Click **Login**.

The image shows the Nagios XI login interface. At the top, it says "Welcome" and "Sign in to Nagios XI". Below this are two input fields: "Username" with the text "nagiosadmin" and "Password" with masked characters. To the right of the password field is a link "Forgot Password?". Below the fields is a blue "Login" button. At the bottom, there are three icons with labels: "Phone", "Sales", and "Forum".

7. Read through the **License Agreement**, check the box, then click **Submit**.

## Finishing Up

Congratulations! You've now successfully installed Nagios XI and are ready to start monitoring your environment.
